

GE Fanuc
Intelligent Platforms
Applied Image Processing

Technical Project Manager

ROLE

Technical Project Manager

CAREER BAND

Lead Professional

LOCATION

Bracknell, Berkshire, UK

GENERAL

GE Fanuc Intelligent Platforms (formerly Octec) , a unit of General Electric Company (NYSE: GE), are world leaders in the design and manufacture of rugged, real-time video tracking and image processing sub-systems. Due to the continued growth of the company, there is a vacancy for a Project Manager / Systems Engineer to provide technical management of projects utilizing our products and capabilities in the area of real-time image processing. These projects range from the supply of standard off-the-shelf products to multi-year developments. The role will be particularly suited to someone who enjoys customer contact and thrives on developing innovative solutions to challenging customer requirements. The right person will have a strong technical background, preferably in image processing or electro-optics, and also be capable of providing the customer interface, technical oversight and schedule control.

ESSENTIAL FUNCTIONS (RESPONSIBILITIES)

- Management of projects utilizing products and capabilities in the area of real-time image processing
- Provide the technical and commercial interface with domestic and international customers
- Develop project plans consistent with the magnitude of projects
- Manage, facilitate and coordinate project development activities
- Communicate regularly with other management regarding project status
- Preparation of high level specifications
- Provide overall technical oversight
- Preparation of proposals
- Some international travel may be required

QUALIFICATIONS/REQUIREMENTS

- Possess a degree in a relevant engineering discipline
- Experience in image processing and/or electro optics systems
- Experience in the defence and aerospace sector would be an advantage
- A track record in the management of multi-disciplinary development activities
- Strong people management skills
- Be willing to prioritize resources and manage customer expectations during times of overload
- Be proactive and able to work on own initiative
- Be customer focused

To apply please forward your CV or contact Marie Cook
